LAMA Pilot Reminder: Regulated Navigation Area - Avoid Loss of Propulsion MSIB (Click here) and for Fuel Oil Changeover Requirements (Click here).

2019 Hurricane Season Gulf of Mexico

(*Source: WeatherOps, powered by DTN*)

Active Tropical Threats					
Feature #	Name	Current Location	7-Day Development Potential	Sustained Wind	Current Movement
-	-	-	-	-	-

While favorable conditions with low wind shear and warm sea surface temperatures are noted across most of the Gulf of Mexico and northeast of the Bahamas, tropical development is not forecast. For the unfavorable regions across the Caribbean, along with eastern and central Atlantic, strong wind shear along with elevated levels of Saharan dust will quell tropical development.

Today's River Stages (NOAA)
