Lower Mississippi River (LMR) Dredging Update 81219

Members,

The Corps of Engineers Mississippi Valley New Orleans (MVN) continues dredging operations in response to active shoaling deposited by historic long-term high river stages (record flood event created by record precipitation levels). There are three hopper dredges and two cutterhead dredges working in the area of Southwest Pass and three dustpan dredges working on the Crossings Above New Orleans. The MVN did not receive any bids from the dredge contractors to the advertisement of Southwest Pass Hopper Dredge Rental Contract #12-2019 and no viable options to secure an additional hopper dredge have been identified.
