Notice to the Area Port of New Orleans Community

Date : October 28, 2015

No.: 15-015

SUBJECT: Advanced Qualified Unlading Approval (AQUA) Lane Pilot Program

PURPOSE

The purpose of this notice is to inform the New Orleans Trade Community of a 90-day pilot program in the **Port of New Orleans only** granting advanced cargo unlading for qualified sea carriers. *This pilot applies only to container carriers.*

BACKGROUND

AQUA Lane was developed to create an expedited vessel entrance system to those C-TPAT sea carriers that qualify under a set of predetermined mandates that will give the carrier the ability to immediately unlade merchandise upon arrival in the United States.

This new C-TPAT benefit was developed in a joint partnership between CBP/C-TPAT, sea carriers, trade associations, COAC and CBP management. This process includes elements of CBP agriculture and trade review.

The AQUA Lane concept will benefit both the trade community and CBP. The new concept will enhance CBP's utilization of resources as well as improve the current informal unlading approval process amongst the various ports of entry. It will provide tangible benefits to the sea carriers as well as their trade partners in the overall supply chain while enhancing security to the supply chain process.

Nothing in this pilot changes the Port Director's current ability to grant preliminary entrance for vessels not eligible for AQUA Lane privileges as has been the past practice in the port of New Orleans.

AQUA Lane privilege requirements:

- Certified partner in C-TPAT (carrier and terminal location)
- Compliant with ISF requirements
- Compliant with Agriculture requirements to include all required certificates
- Crewmember must remain onboard until formal CBP processing
- All containers must be delivered to a C-TPAT terminal operator

ACTION

This pilot will be conducted from Sunday, November 1, 2015 through Sunday, January 31, 2016.

This pilot will require eligible carriers to request AQUA Lane privileges through the submission of CBP Form 3171, section 9, box 5 prior to arrival. The words "AQUA Lane" should be annotated in this box to request AQUA Lane privileges.

CBP will vet the vessel for any issues to include trade compliance, agriculture and admissibility issues. The Port Director or designee will give final approval for AQUA Lane and the carrier will be notified via routine CBP Form 3171 approval and/or denial process.

Questions regarding this information notice may be directed to Chief CBPO Denise Emmer at (504) 623-6652.
