

Export Modernization: Electronic Export Manifest Pilot

Electronic Export Manifest Features & Benefits

Electronic Export Manifest (EEM) allows pre-departure manifest data to be collected on all export transactions electronically and includes master and house level manifest data from the carriers that control that information.

The modernized vision for exports includes **streamlined data elements, post-departure filing, and standardized manifest data elements.**

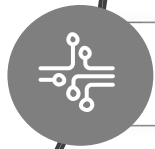

Cargo processing efficiency

Streamlined reporting and protection of proprietary shipment data

Beneficial resolutions

Elimination of redundant data elements and better data access

Potential cost savings

FOR OCEAN VESSEL EXPORTS ONLY

On October 1, 2024, CBP will disable the option to submit CBP Form 1302A Cargo Declaration- Outward with Commercial Forms in the Document Image System (DIS) for outward ocean carrier vessels. Carriers currently utilizing DIS to file CBP Form 1302A are strongly encouraged to join the EEM pilot.

For more information on the EEM Pilot, scan the QR code or navigate to: www.cbp.gov/trade/ace/technical/export-manifest
